SAFETY DATA SHEET
enMotion® Foam Hand Sanitizer with Moisturizers

Section 1. Identification

| Product identifier | : enMotion® Foam Hand Sanitizer with Moisturizers |
| Product List       | : enMotion® Foam Hand Sanitizer with Moisturizers, Fragrance Free, Lt. Green SKU 42331 |
|                    | : enMotion® Foam Hand Sanitizer with Moisturizers, Fragrance Free, Lt. Green, 45mL SKU GP6172 |
|                    | : enMotion® Foam Hand Sanitizer with Moisturizers SKU 42334 |
|                    | : enMotion® Foam Hand Sanitizer with Moisturizers 45 mL SKU GP5135 |
|                    | : enMotion® Foam Hand Sanitizer with Moisturizers, Fragrance Free SKU 42334C |
| Other means of identification | : Not available. |
| SDS #              | : Not available. |
| Product type       | : Liquid |

Recommended use of the chemical and restrictions on use

Recommended use
Hand Sanitizer

Restrictions on use
This product is regulated as Natural Health Product in Canada and is intended for personal hand hygiene to help prevent the spread of bacteria.

Supplier's details
Manufactured for:
Georgia-Pacific Consumer Products LP
133 Peachtree Street NE
Atlanta, GA 30303

Technical Information: 866.435.5647
SDS Request: 404.652.5119
E-mail: SDSREQ@gapac.com

Emergency telephone number (with hours of operation)
Chemtrec - Emergency: 800.424.9300

Section 2. Hazard identification

Classification of the substance or mixture
FLAMMABLE LIQUIDS - Category 2
EYE IRRITATION - Category 2A

GHS label elements

Hazard pictograms

Signal word
Danger

Hazard statements
Highly flammable liquid and vapor.
Causes serious eye irritation.

Precautionary statements

General
Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.

Prevention
Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Keep container tightly closed. Wear protective gloves/eye protection, if handling large quantities.
Section 2. Hazard identification

Response: In the event of large spill and subsequent exposure to the product:

IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention. In case of fire: Use extinguishing media suitable for surrounding materials.

Storage: Store in a well-ventilated place. Keep cool and protect from sunlight.

Disposal: Dispose of contents and container in accordance with all local, regional, national and international regulations.

Other hazards which do not result in classification: In the event of a large spill, sparks may ignite liquid and vapor. May cause flash fire or explosion.

Section 3. Composition/information on ingredients

Substance/mixture: Mixture

Other means of identification: Not available.

<table>
<thead>
<tr>
<th>Ingredient name</th>
<th>% (w/w)</th>
<th>CAS number</th>
</tr>
</thead>
<tbody>
<tr>
<td>ETHYL ALCOHOL</td>
<td>60 - 80</td>
<td>64-17-5</td>
</tr>
<tr>
<td>ISOPROPYL ALCOHOL</td>
<td>1 - 5</td>
<td>67-63-0</td>
</tr>
</tbody>
</table>

Composition Comments
Percent by volume concentration of ETHYL ALCOHOL (64-17-5) is 70% (v/v).

Meets Alcohol Requirements stated in Health Canada Monograph for Antiseptic Skin Cleansers (Domestic/ Personal Use).

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First-aid measures

Description of necessary first aid measures

Eye contact: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.

Inhalation: Move exposed person to fresh air. Get medical attention if symptoms occur.

Skin contact: If irritation occurs, flush skin with plenty of water. Call a physician if irritation persists.

Ingestion: Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Most important symptoms/effects, acute and delayed

Potential acute health effects

Eye contact: Causes serious eye irritation.

Inhalation: No effects expected under normal conditions of use.

Skin contact: No effects expected under normal conditions of use. Prolonged skin contact may cause temporary irritation.

Ingestion: May be harmful if swallowed.
Section 4. First-aid measures

Over-exposure signs/symptoms

</tr>
</tbody>
</table>

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments: No specific treatment.

Protection of first-aiders: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media: Use dry chemical, CO₂, water spray (fog) or foam.

Unsuitable extinguishing media: Do not use water jet.

Specific hazards arising from the chemical: Highly flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.

Hazardous thermal decomposition products: Decomposition products may include the following materials: carbon dioxide; carbon monoxide.

Special protective actions for fire-fighters: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: If a large number of containers are ruptured, treat as a bulk material spillage according to the instructions in the clean-up section. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

For emergency responders: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Date of issue/Date of revision: 12/11/2020
Date of previous issue: 12/11/2020
Version: 2
Section 6. Accidental release measures

Environmental precautions: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures: For external use only. Keep out of the reach of children. Do not get in eyes. Do not ingest. Wear gloves and safety glasses or goggles if handling large quantities. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general occupational hygiene: When using do not smoke. See also Section 8 for additional information on hygiene measures.

Conditions for safe storage, including any incompatibilities: Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Section 8. Exposure controls/personal protection

**ISOPROPYL ALCOHOL**

| CA Alberta Provincial (Canada, 6/2018). | STEL: 1250 ppm 15 minutes. TWA: 1000 ppm 8 hours. |
| CA Ontario Provincial (Canada, 1/2018). | TWA: 200 ppm 8 hours. STEL: 400 ppm 15 minutes. |
| CA Quebec Provincial (Canada, 1/2014). | TWAEV: 400 ppm 8 hours. TWAEV: 983 mg/m³ 8 hours. STEV: 500 ppm 15 minutes. STEV: 1230 mg/m³ 15 minutes. |
| CA Saskatchewan Provincial (Canada, 7/2013). | STEL: 400 ppm 15 minutes. TWA: 200 ppm 8 hours. |

**Appropriate engineering controls**

: Use only with adequate ventilation.

**Environmental exposure controls**

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

**Individual protection measures**

**Hygiene measures**

: When using do not smoke.

**Eye/face protection**

: None necessary under normal conditions of use. Wear safety glasses or goggles if handling large quantities.

**Skin protection**

**Hand protection**

: None necessary under normal conditions of use. Wear appropriate chemical resistant gloves if handling large quantities.

**Body protection**

: None necessary under normal conditions of use. Wear appropriate chemical resistant gloves if handling large quantities.

**Other skin protection**

: None necessary under normal conditions of use. Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling large amounts of this product.

**Respiratory protection**

: Under normal conditions of use respiratory protection is not expected to be required.

---

**Section 9. Physical and chemical properties**

**Appearance**

**Physical state**

: Liquid [Foam when dispensed.]

**Color**

: Clear light green

**Odor**

: Alcohol

**Odor threshold**

: Not available.

**pH**

: 6 to 9

**Melting point**

: -114.1°C (-173.4°F)

**Boiling point**

: 78.5°C (173.3°F)
Section 9. Physical and chemical properties

Flash point : Closed cup: 20°C (68°F)
Evaporation rate : Not available.
Flammability (solid, gas) : Not available.
Lower and upper explosive (flammable) limits : Not available.
Vapor pressure : Not available.
Vapor density : Not available.
Relative density : 0.9
Solubility : Not available.
Solubility in water : Not available.
Partition coefficient: n-octanol/water : Not available.
Auto-ignition temperature : 362.7°C (684.9°F)
Decomposition temperature : Not available.
Viscosity : Not available.
Flow time (ISO 2431) : Not available.

Section 10. Stability and reactivity

Reactivity : No specific test data related to reactivity available for this product or its ingredients.
Chemical stability : Product is stable under normal conditions of use.
Possibility of hazardous reactions : Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid : Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.
Incompatible materials : Reactive or incompatible with the following materials: oxidizing materials
Hazardous decomposition products : Small amounts of nitrogen oxides, carbon monoxide, carbon dioxide, and hydrocarbons may be released.

Not available.

Information on the likely routes of exposure
Not available.

Potential acute health effects

Eye contact : Causes serious eye irritation.
Inhalation : No effects expected under normal conditions of use.
Skin contact : No effects expected under normal conditions of use. Prolonged skin contact may cause temporary irritation.
Ingestion : May be harmful if swallowed.

Symptoms related to the physical, chemical and toxicological characteristics

Date of issue/Date of revision : 12/11/2020  Date of previous issue : 12/11/2020  Version : 2
Section 11. Toxicological information

Eye contact: Adverse symptoms may include the following:
pain or irritation
watering
redness

Inhalation: coughing

Skin contact: No specific data.

Ingestion: No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure
Potential immediate effects: Not available.
Potential delayed effects: Not available.

Long term exposure
Potential immediate effects: Not available.
Potential delayed effects: Not available.

Potential chronic health effects
Not available.

General: Not hazardous under normal conditions of use. Chronic ingestion of ethanol can cause liver toxicity.

Carcinogenicity: Not hazardous under normal conditions of use. Ethanol: Chronic ingestion of ethanol in alcoholic beverages is classified by IARC as Group 1 Carcinogenic to humans.

Mutagenicity: Not hazardous under normal conditions of use.

Teratogenicity: Not hazardous under normal conditions of use.

Developmental effects: Not hazardous under normal conditions of use. Chronic ingestion of ethanol can cause reproductive/developmental effects.

Fertility effects: Not hazardous under normal conditions of use.

Mobility in soil
Soil/water partition coefficient (K_{oc}) : Not available.

Other adverse effects : No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
